JOB SUMMARY

SAP BTP Full Stack and CAP (CAPM) Developer with 3+ years of experience in SAPUI5, SAP Fiori, OData, and enterprise application development on SAP BTP. Experienced in building cloud-native enterprise applications using CAPM, CDS modeling, and SAP HANA Cloud. Skilled in frontend-backend integration and deployment on SAP BTP Cloud Foundry.

WORK EXPERIENCE

INFLEXION TECHNOLOGY

Technical Consultant

Bangalore, India

Jan 2023 – Present

Property Zone:

- Developed a Property Zone platform to streamline property and contract management for real estate operations using SAPUI5 MVC architecture and Java backend in SAP CAP. Enabled clients to efficiently create, update, and track property details and contract lifecycles with improved accuracy.
- Optimized workflows and enhanced data accessibility to improve end-to-end real estate operations. Collaborated with cross-functional teams to translate business requirements into technical solutions. Implemented secure authentication and role-based access using XSUAA.

ECC – Engineering & Construction:

- Developed an ECC platform to manage engineering and construction projects, enabling efficient handling of project data, contracts, and execution lifecycles with improved data accuracy, real-time tracking, and end-to-end visibility across project phases.
- Built the solution using SAP CAP (CAPM) with CDS modeling, SAP Cloud SDK and OData V2/V4 services, deployed on SAP BTP (Cloud Foundry) and integrated with SAP Fiori Launchpad/Work Zone, ensuring a scalable, cloud-native, and service-oriented architecture with seamless enterprise integration.

LightHouse:

- Implemented an end-to-end logistics platform using SAPUI5, Custom CDS Views, OData services, and SOAP APIs for shipment scheduling and cargo tracking, enabling shipping companies and port authorities to efficiently manage shipments, monitor cargo operations in real-time, and improve operational visibility across logistics processes. Worked closely with ABAP teams for backend integration and data service consumption.

Payroll:

- Engineered a comprehensive Payroll and HR module providing full lifecycle management for employees with RESTful API integrations.
- Automated payroll processing, attendance tracking, and employee data management, enhancing HR efficiency and accuracy. Prepared technical documentation and supported deployment activities.

Shiftflex:

- Built an intelligent shift-scheduling platform designed to automate workforce allocation and reduce manual planning efforts.
- Developed responsive SAP UI5 applications on SAP BTP to automate scheduling workflows, significantly reducing human errors and ensuring seamless usability across desktop, tablet, and mobile.

TECHNICAL SKILLS

- **Programming Languages:** Java, SQL, Python, JavaScript, Node.js
- **Backend:** Spring Boot, JPA, Hibernate, RESTful APIs
- **SAP Technologies:** SAP BTP, SAP CAP (CAPM, CDS, OData), SAP Fiori, SAPUI5, SAP HANA Cloud, SAP Gateway, SAP Fiori Launchpad, SAP Web IDE
- **Databases:** MySQL, Stored Procedures, PostgreSQL
- **Tools:** Eclipse, VS Code, Git, GitHub, Postman, Business Application Studio
- **Others:** HTML, CSS, XML, Automation, Agile Methodologies, CI/CD, XSUAA, Unit testing, Integration testing, UAT

CERTIFICATION

- Java Full Stack Development and Testing from Kodnest
- Advance Python Programming from Simplilearn
- SAPUI5 Professional Development from Udemy
- Generative AI from SAP
- Developed an SAP Fiori application based on the SAP CAP model
- Certification in HTML and JavaScript from Simplilearn
- Scrum Master Certification from Simplilearn

ACADEMIC PROJECTS

- Fully Automated Cottage Cheese Manufacturing and Processing System
Developed a low-cost, efficient domestic paneer manufacturing system to ensure safe and unadulterated production.
Selected for **KSCST-IISC Bangalore (2021)** under Project Proposal Number **44S_BE_2085**.
- Mobile Robot Serving Pandemic
Designed a mobile robot to support healthcare needs during the pandemic, reducing direct contact and risk for frontline workers.
- University Web Application Result System
Built Java-based web application similar to a university results portal to streamline result viewing and student data access.
- Internship – HVAC Designing (Prinston Smart Engineers, Qatar)
Completed a one-month internship focused on HVAC system design, heat load calculations, HAP software usage, and MEP coordination for buildings.

ACHIEVEMENTS

- Runner-up in Hack to Build - 2023
- Winner – Hackathon 2024

WORKSPACE

- Git: github.com/PratheekMeti
